

PURPLE LIGHTS FOR CAUDA EQUINA SYNDROME

For the entire month of November, we will be lighting up our homes in purple to raise awareness of CES by remembering those that we have lost along the way.

WHAT IS CAUDA EQUINA SYNDROME?

Cauda Equina Syndrome (CES) is a rare spinal disease that causes a collection of neurological and systematic symptoms due to an injury to the spinal nerve roots in the lumbar spinal canal and sacrum called the cauda equina (CE)- Latin for "horse's tail." The CE is a relay station between the lower body to the spinal cord.

HOW TO HELP

Light up your home in purple to help spread awareness

Donate to aid us in our mission

Volunteer

Become a Patient Advocate

Become an Ambassador
